github.com/B-mud | linkedin.com/in/a-jagadeesh-085571425

Professional Summary

AI & ML Engineer with hands-on experience in Machine Learning, Large Language Models (LLMs), Backend Architecture, and Web Development. Proficient in Python, PyTorch, FastAPI, React/Next.js, and building transformer-based AI solutions. JLPT N4 certified and actively pursuing JLPT N3. Seeking technical roles integrated with Japanese-language environments.

Technical Skills

Programming: Python, Java, JavaScript, SQL
AI / ML / LLMs: PyTorch, TensorFlow, Scikit-learn, OpenCV, NumPy, Pandas, Librosa, Transformers (Attention Mechanisms, BPE Tokenization, Multi-Head Attention), Prompt Engineering, Vector Databases
Web Development: Next.js, React.js, FastAPI, Flask, Django, HTML, CSS, REST APIs
Databases: Supabase, MongoDB, Oracle SQL
Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Cursor, v0, Bolt.new, Ollama

Japanese Language Proficiency

- **JLPT N4 Certified:** Passed official accreditation.
- **JLPT N3 Preparation:** Currently studying for upper-intermediate proficiency.

Projects

Career Bridge AI | *Next.js, FastAPI, Supabase, Python, LLMs, PyTorch*
– Built an intelligent career guidance platform mapping candidate skill profiles against job market requirements using NLP and LLM APIs.
– Implemented custom TF-IDF vectorization, Cosine Similarity, and structured prompt engineering pipelines for accurate skill-matching and contextual job recommendations.
– Integrated authentication, relational data schemas, and API routes using Supabase and FastAPI.

Custom Transformer & LLM Pre-tokenization | *Python, PyTorch*
– Built key components of a Transformer-based Large Language Model from scratch using PyTorch based on foundational AI research principles.
– Implemented Byte-Pair Encoding (BPE) tokenization, positional embeddings, and Multi-Head Self-Attention layers to understand internal LLM attention mechanics.

Art Style Transfer | *Python, CycleGAN, Flask*
– Developed a deep learning image transformation application utilizing CycleGAN models and deployed an interactive web interface via Flask.

Experience

Edify Techno Solutions | *AIML & DS Intern* Jun. 2024
– Completed an intensive internship focused on core Machine Learning models, exploratory data analysis (EDA), and data science workflows.

Acmegrade | *Artificial Intelligence Intern* 2023
– Engineered end-to-end ML pipelines for data classification tasks and automated dataset pre-processing scripts in Python.

Joni Software Solutions | *Python with Django & ML Workshop* Aug. 2025
– Developed full-stack web modules integrating Python, Django backend architecture, and predictive Machine Learning algorithms.

Education

Jerusalem College of Engineering | *B.E. Computer Science and Engineering (AI & ML)* Expected 2026
– Chennai, India

Achievements & Presentations

- **Winner:** Hackathon 2025 at AM Jain College.
- **Paper/Project Presentation:** Presented project "B-MUD" at Kurukshetra '24, Anna University.

Languages

English, Japanese (JLPT N4 Certified), Tamil
